

# Training Requirements for Construction

## 1 Who Should Attend . . .

This workshop is a must for anyone concerned about health and safety on the job including:

- ▶ Managers concerned about liability and worker's compensation costs
- ▶ Employees who want to learn proper techniques for protecting their safety and health at work
- ▶ Business owners who want to learn about compliance with MIOSHA

## 2 Why you need this Workshop . . .

- ▶ To reduce disabling injuries and illnesses to employees - and to ensure that every worker goes home safe and healthy every day.
- ▶ To reduce the high direct costs of work-related injuries, which grew to \$42.5 billion nationally in 2000, and indirect costs, which were estimated at an additional \$127 - \$212 billion in 2002. (*2003 Liberty Mutual Safety Index.*)
- ▶ To enhance your company's bottom line. A strong safety and health commitment not only protects workers, it also reduces worker's compensation costs, improves employee morale, and increases production and quality.

## 3 What You'll Learn . . .

This course will cover the training requirements from the construction safety standards. Please note that this is an OVERVIEW of the minimum requirements, not the actual training and it is not an in-depth study of training, rather a program to familiarize those responsible with the requirements. There will be a booklet of the Construction Safety Training Requirements provided to each participant for use during and subsequent to class.

### Agenda

*We offer a flexible  
program agenda  
to emphasize the  
topics you  
want most.*

Safety & Health Program

# Facilitator

Debra Stewart Johnson was appointed to the MIOSHA Bureau in 1987. She has worked in both the General Industry and Construction Safety Divisions as a compliance officer before her appointment to the CET division in 2001 as a construction safety consultant. Prior to State employment, Deb worked for the Sheet Metal International Union Local 360 and was the first female to complete the union's apprenticeship program and work as a journeyman. Deb has also worked as a licensed residential builder.

She is an authorized OSHA Construction 10 hour and 30 hour trainer and her college education background includes studies in chemistry, biology, mathematics and engineering. Deb has a wide range of work experience in the bureau from paper mills to agriculture, oil wells to communication towers as well as construction sites.
